Table 1: Busiest routes 2025

limits vehicle length to 12 metres, which caps its capacity despite high demand.

Route 3 crosses the river and connects the university campus with the central station. Its bridge span

busiest routes in 2025 with their average weekday ridership and scheduled headway at midday.

The core network consists of twelve high frequency routes and 22 local routes. The table shows the

Route Network

employer partnership programme covers 34,000 pass holders.

The single fare is 2.75 CAD and the monthly pass costs 96 CAD. Children under 12 travel free, and the peaked between 7:30 and 8:30 in the morning.

Total ridership in 2025 was 41.2 million rides, an increase of 4 percent over 2024. Weekday boardings

Ridership and Fares

electric buses on route 34, so the express route keeps diesel buses as reserve. The authority targets a fully zero emission fleet by 2035. Winter range loss reduced the effective duty of fast chargers, and Eastgate has six. By December 2025 the fleet included 48 battery electric buses. The Ironworks Yard depot operates 26

Fleet Electrification

are installed in 84 percent of the fleet and are mandatory for all new vehicles. The ramp failure rate in daily service was 0.7 percent in 2025. Audio-visual next stop announcements

fleet have ramps or kneeling suspension.

92 percent of all stops are wheelchair accessible with level boarding or a raised pad. All buses in the

Accessibility

approach of route 3, where OTP dropped to 71 percent during the afternoon peak. Congestion caused 54 percent of delays and traffic incidents 21 percent. The worst corridor is the bridge minute of schedule at time points. System wide on-time performance reached 87.3 percent in 2025, measured as departure within one
