

Caledonia Woollen Mills

Company Review 2025

Caledonia Woollen Mills - Peebles, Scotland

P3 synthetic corpus - fusion-proto-v1

The mill employs 112 staff across weaving, finishing, warehousing and the shop on the riverside.

four generations.

Caledonia Woollen Mills has woven tweed and blankets since 1889 and remains family-held through

Overview

- Water turbine: installed 1906
- Yarn finished per year: 96 tonnes
- Looms in the shed: 74

water turbine.

The dye kitchen works with natural lichens from the hills, and the 1906 engine room houses the restored tonnes of yarn a year.

The weaving shed runs 74 looms driven by the original line shafting, and the finishing house handles 96

Facilities

Energy costs fell 14 percent after heat recovery was fitted to the tumble dryers and the hot-water circuit.
Revenue for 2025 was 5.6 million pounds, with exports to Japan taking 21 percent of finished cloth.

Figures

The apprentice scheme will take six trainees a year for weaving and finishing from the local college.
the engine room.

A visitor centre opens in 2027, powered by 2,400 solar panels on the mill roofs and a small battery in
