

Fal Lightvessel Trust

Station Report 2025

Fal Lightvessel Trust - Falmouth, United Kingdom

P3 synthetic corpus - fusion-proto-v1

corrections.

Crews rotate every 28 days by tender, and the shore office in Falmouth keeps the station logs and chart service begun in 1902.

The Fal Lightvessel Trust maintains three lightvessels on the southwest approaches, continuing a

Overview

- LED refit: completed 2020
- Light range: 19 nautical miles
- Mast height: 15 metres

compressed air only.

The 2020 LED refit replaced the old optics on all three hulls, and the fog signal now runs on

Each mast rises 15 metres above deck and the main light reaches 19 nautical miles in clear weather.

Facilities

Station running costs reached 1.4 million pounds in 2025, mostly crew wages and dry-dock inspections. The 2020 LED refit cost 780,000 pounds across the fleet and cut power use by a third per vessel.

Figures

The trust will open the retired inner vessel as a static museum ship at the marina pontoon.

banks.

Hybrid power for the two outer vessels is scheduled for 2028, pairing diesel generators with battery
